## INFORMATION

PAGE 1/1

SUBJECT

**PACBRAKE C12009 - C12011  
EXHAUST RETARDER/WARM-UP KITS**

APPLICATION

**CATERPILLAR® 3116 - 3126 ENGINES**

### I M P O R T A N T

- Caterpillar 3116 engines will require a Pacbrake P17470 throttle switch (included) to activate the brake during retarding mode. If this kit is used as a warm-up system only, the switch is not required.
- Caterpillar 3126 engines will require wiring into Pin 40 of the electronic control module (ECM) for the activation of the retarding mode. For warm-up system only, this procedure is not required.
- Vehicles equipped with Allison MD3060 automatic transmissions must be wired according to the enclosed Pacbrake wiring supplement – Form L7026. Consult Pacbrake for the interface wiring kit information and part number.
- Vehicles equipped with Allison AT Series automatic transmissions will not require additional wiring. Please consult enclosed Service Bulletin #124.
- Please refer to the sheet on maintenance tips for restricter service information.
